

Next-Generation Messaging and Collaboration for Your Organization

Zimbra Collaboration Suite (ZCS) solves the challenges facing today's organization. ZCS provides an innovative experience designed to manage large inboxes, has robust collaboration, works with all desktops and devices, reduces administration complexity, and is an open technology platform that easily integrates your mission critical services.

"Zimbra provides our 33,000 students, faculty, and staff one email and calendar solution across all the different desktop environments."

— Bruce Maas, CIO
University of Wisconsin-Milwaukee

ZIMBRA COLLABORATION SUITE

Innovation and freedom of access:

- Use AJAX web application on Windows, Apple or Linux desktops
- "Over-the-air" sync to popular devices (BlackBerry, iPhone)
- Supports IMAP/POP, Outlook (MAPI), iSync, iCal, CalDAV, RSS

Open technology platform:

- Easily integrate 3rd party applications and web services
- Unified communication platform simplifies administration and reduces total cost of ownership

Hosted and on-site deployment options:

- Chose on-premises or hosted deployment
- Zimbra hosting partners in your local market provide additional customization and outsourcing options

Zimbra's award-winning Web Client

Zimbra Collaboration Suite (ZCS) Features

ZCS is a complete open source email and collaboration platform. It features Email, Contacts, Calendar, Documents, File Sharing, Tasks, Social Media, plus synchronization to other desktops and devices.

WEB CLIENT:

- Rich browser-based AJAX interface with application-like features such as drag and drop, tagging and conversation views
- Comprehensive search, including within attachments, and saved search folders
- Share and collaborate with peers including inboxes, contacts, calendars, documents, files and tasks
- Enterprise calendars with shared free-busy times; interoperable with Microsoft Exchange 2003 / 2007
- Create shared wiki documents and manage files from a single Briefcase document repository
- Integrate 3rd party services as "mash-ups" or application "tabs", including Twitter and Facebook

ADMINISTRATION:

- Browser-based AJAX Admin Console and full Command Line Interface (CLI) to manage ZCS
- Migration wizards for Exchange, Domino, GroupWise, plus standard IMAP migration
- Real-time mailbox backup and restore; native hierarchical storage management (HSM); and high-availability (HA) / clustering
- Cross mailbox discovery and archiving for regulatory compliance
- Integrated Anti-Spam, Anti-Virus, and Directory Services (LDAP, Active Directory)
- Open web service APIs / REST interfaces

HOSTED AND MULTI-DOMAIN ADMINISTRATION:

- Fully supports multi-tenancy and delegated administration for hosting and service providers
- Role-based delegated administration to create domain or limited administration settings per account
- Completely re-brand, re-skin and customize the Web Client experience
- Manage end-user features, quotas, storage policies via Class-of-Service (CoS)

ZIMBRA DESKTOP:

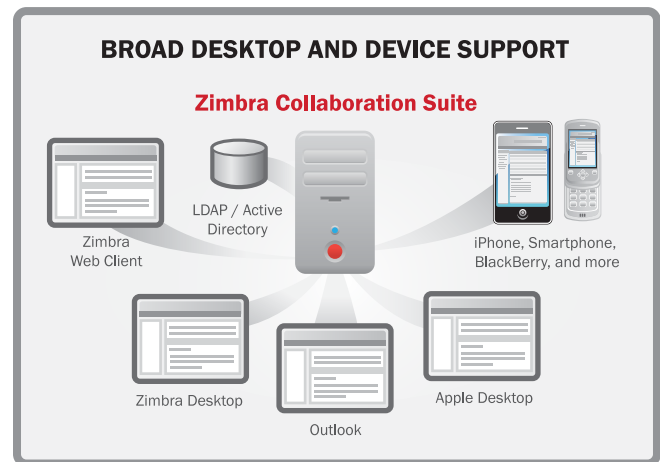

- Enables offline access to the Zimbra web experience on Mac, PC, and Linux desktops
- Aggregates Yahoo! Mail, Gmail, AOL, Hotmail, and other POP / IMAP accounts
- Sync Yahoo!, Gmail Address Book and Calendar

OTHER DESKTOPS:

- MAPI synchronization to Outlook 2003 / 2007 with full delegate and offline access
- Native synchronization to Apple desktop applications via Zimbra iSync Connector, plus CalDAV support
- Support for all POP3 / IMAP4 Clients

MOBILE:

- Native synchronization to BlackBerry handsets via Zimbra Connector for BlackBerry Enterprise Server (BES)
- Native "over-the-air" synchronization to iPhone, Windows, Palm, and Symbian OS Smartphones
- Set mobile security policies including device wipe, PINs and device management features on user accounts.
- Rich browser-based experience for Zimbra email, contacts, calendar and files on any XHTML capable device

Browser Support: Microsoft Internet Explorer, Mozilla Firefox, Apple Safari for Microsoft Windows, Apple OS X, and Linux desktops

Server Operating Systems: Red Hat, SUSE, Ubuntu, Fedora, Debian, Mac OS X

3rd Party Client Support: Microsoft Outlook and Entourage, Mozilla Thunderbird, Apple Mail, Apple iCal, Apple Address Book, Mozilla Sunbird, Novell Evolution

Protocol Support: MAPI, IMAP, POP, XML, HTTP / S, SOAP, LDAP, SIP, VoIP, iSync, RSS, Atom, iCal, CalDAV, WebDAV
